Atomic Web Browser is a user-friendly piece of software whose main function is to assist you in exploring the Internet, allowing you to access any web page you want, in just a few moves. A very simple user interface Atomic Web Browser features a basic and fairly unimpressive interface, that vaguely resembles Internet Explorer, on whose core Atomic Web Browser is

based. The main toolbar features 'Backward', 'Forward' and 'Home' buttons, as well as an address bar and a 'Search' field. A dedicated menu lets you open and close tabs or windows, while the 'Show Features' menu enables you to use Atomic Web Browser's functions or adjust its settings. Main functions and components Atomic Web Browser offers several utilities you can work with, for instance a 'Media' player,

which allows you to render audio, video and even image files that are stored locally on your computer. Moreover, you can work with the 'Atomic Gadgets', namely a very basic 'Calculator', 'Calendar' and 'Time Selector'. Atomic Web Browser has a built-in 'Notes' component allowing you to create up to seven different messages. The 'Notes' window can be set to use a transparent background, or a simple, white one. Atomic

Web Browser also features a 'Bookmarks', but you need to add them manually to the list, as it does not feature a keyboard shortcut or a button integrated into its interface to do that.

However, it seems unable to remember the web pages that you add from one browsing session to the other. Finally, Atomic Web Browser has several other errors that show it is still under development, along with some moments of

unresponsiveness which might deter many from using it when they can work with more stable software. About Old version types This software was reviewed by our antivirus provider. The provider's latest verdict is: Virusfree. No details: No details available No news: This software is not listed as "new" because our provider does not list it as "new" for the moment. The following new apps have been listed: Antivirus: Antivirus Pro 2013

1.10.0.2 First install date:
01-01-2014 Provider: PC
