mi-360 is a small, open-source utility that enables a Xiaomi Gamepad to be used as an Xbox 360 controller. It has been made available as both source code and a package for the BeOS OS. Version: This article describes the patch that went into Haiku version 21.2 to fix a bug that caused Sony PSP to behave like an Xbox gamepad (report) and a fix to make PS3 controllers work (report). Topic outline This document describes the details of the two (2) above mentioned changes. Version 21.2 made the following changes: * Added the PS3 controllers support * Fixed an issue with the PSP (Sony's Walkman) gamepad (see above) This report contains information about the PS3 controller support in Haiku 21.2. The following information is relevant for those using a PS3 controller with Haiku: * In the previous release, the ps3_controller.c driver had hardcoded device names for both the PS3 controllers, and it had no way to switch between them. In Haiku 21.2, this driver has been updated to work with any of the two PS3 controllers present on the system. The following symbols were added to the driver: * The "PS3S" symbol is used to identify the first PS3 controller. * The "PS4S" symbol is used to identify the second PS3 controller. * The driver has also been extended to allow the mapping of the controllers to the supported gamepad types: * The mapping for the controllers is done by the driver, but it has no way to disable any of the bindings before mapping, so you can still change the mapping after that. * Using the "PS3S" and "PS4S" symbols enables the following bindings: PS3 Controller - Xbox 360 Controller PS4 Controller - Xbox 360 Controller The driver for the PSP (Sony's Walkman) gamepad is the same as the one used for the PS3 controllers, with the exception that the mapping is always done in the gamepads framework. The driver has been updated in Haiku 21.2 with the following symbols: * "PSP" is used to identify the PSP (Walkman) gamepad. * "PO" is used to identify the "PlayStation Portable." * The driver enables the following bindings: PSP Controller
